EDUCATION

CUNY Lehman College

Bachelor of Computer Science

GPA: 3.95/4.0

Expected Graduation: May 2026

PROJECTS & PERSONAL DEVELOPMENT

Automated Parking Detector (Personal Project – Python & OpenCV)

- Built a computer vision system to automatically detect open and occupied parking spots using OpenCV and supervised learning techniques
- Optimized object detection algorithms and data attribution pipelines, improving classification accuracy and reliability.
- Deployed a local web application for live monitoring and parking queue management via Raspberry Pi camera feed.
- Integrated real-time threat detection module, enhancing system security and reducing false positives by 30%.

Full Stack Restaurant Website – adnanislamdev.com (JavaScript, Next.js, React)

- Developed a responsive full stack website for a client's restaurant business using Next.js and React, delivering a modern and user-friendly interface.
- Improved site performance and design by implementing optimized components, dynamic routing, and server-side rendering.
- Collaborated with the client to tailor the site's branding and features, ensuring a smooth user experience across devices.

EXPERIENCE

Best Buy LLC - New York, NY

Geek Squad Senior | Aug 2024 – Present

- Lead a team of 5 Geek Squad Agents, providing mentorship, training, and performance guidance to enhance service efficiency.
- Drive sales by managing high-priority client escalations and implement workflow optimizations, reducing service turnaround times by 30%.
- Develop and deliver training sessions on cybersecurity best practices, malware removal, and data recovery, improving team proficiency and customer satisfaction scores.
- Spearhead process improvements for device repairs and upgrades, leading to a 15% increase in service efficiency.

Geek Squad Agent | April 2021 – Aug 2024

- Resolved complex hardware and software issues across Windows, macOS, and Linux platforms.
- Achieved 95% customer satisfaction rate by performing system repairs, upgrades, and optimizations on computers, laptops, tablets, and smartphones.
- Enhanced device efficiency and reduced recurring issues through malware removal, security maintenance, and data recovery.
- Oversaw multiple client issues at once, communicating complex technical concepts in simple terms to ensure fast resolutions and enhance customer satisfaction.

TECHNICAL SKILLS

- Programming Languages: Python, C++, HTML, Java, JavaScript(Next.js), Bash scripting
- Operating Systems: Windows, macOS, Linux
- Software & Tools: Git, React, Vite, CloudFlare, VS Code, Microsoft Office Suite
- Technical Expertise: Hardware diagnostics, system troubleshooting, network configuration, security maintenance
